BUILT TO LAST

BEARING UNIVERSAL PRESS

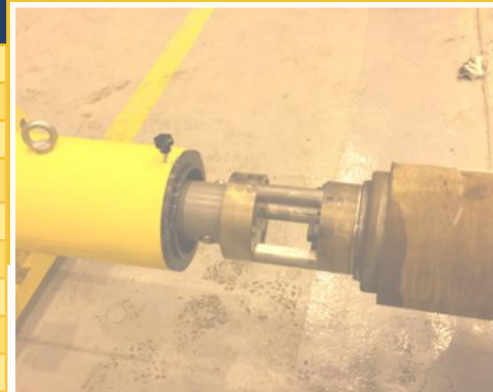

Semi-automatic machine to assemble and disassemble bearings or TBU from/to the axles for maintenance processes. The machine is built on a manual trolley which allows for cylinder height adjustment and simple machine transportation from one place to another. Bearing's pulling or pushing is controlled by an electrohydraulic equipment on board. The machine is equipped with special control panel allowing for precise control of pushing and pulling actions, it is also equipped with two gauges displaying the current parameters.

FEATURES

THE HANDLING EQUIPMENT CONSISTS OF:

- Basic Machine,
- Removal or Installer Devices as interfaces for basic machine,
- Adaptor Kit to Install or Remove specific bearings.

| CHARACTERISTICS | BUP-600 | BUP-1000 |
|--------------------------|--|----------|
| Overall dimensions LxWxH | 1200x720x1400 mm | |
| Weight (approx) | 340 kg | 300 kg |
| Puller max capacity | 600 KN | 1000 KN |
| Installer max capacity | 420 kN | 660 kN |
| Cylinder stroke | 300 mm | |
| Max shaft diameter | 200 mm (possible to increase with special Device and Adaptors) | |
| Min shaft diameter | 100 mm (possible to reduce with special Device and Adaptors) | |
| Max operating pressure | 240 bar | 400 bar |
| Main power supply | 400V - 50/60Hz 3P+E (Max. 2,5kW) | |
